

MONEY\$HOT

SEND A DRINK TO ANYONE, ANYWHERE!

THE PROBLEM

**I want to buy another person a drink remotely using my phone.
The person then has to be able to redeem the drink with participating bar.**

Getting Bars to participate.

THE SOLUTION

**APP/WEB Platform that allows users to send and receive drinks.
Back end that allows participating bars to keep track of drinks redeemed.**

**CROWDFUNDING: Give users a platform to use social media
to receive drinks at their local favorite bars.**

MARKET VALIDATION

8%

of the total gift card spending in 2015 will be done electronically. This segment experiences continuous growth and is expected to reach **14%** in 2017.

33%

more e-gift cards will be purchased compared to 2013 by people who already purchased e-gift cards.

As a comparison the same number for physical gift cards is 20%.

13%

BUSINESS MODEL

The current business model is we are charging \$2 for every transaction fee. This may change for percentage.

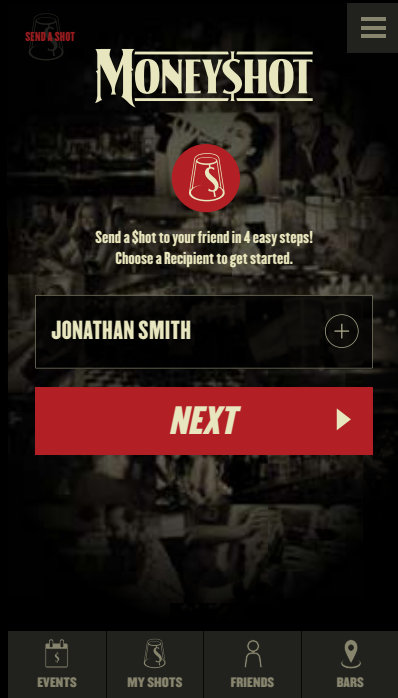

In the future there will be room for advertisement money once a network is developed, especially from liquor companies.

Potential premium paid versions for bar owners, with special access to user network. (Advertising drink specials, or events to users in the area)
